NEW WIFI ROUTER

That's right! Our internet is now bigger and better thanks to our new wifi router. Allowing for up to 250 device connections at once we are excited to be meeting our community's needs for more reliable free internet access.

This router was recently purchased and installed through a grant and it's use is paid for the next 3 years of service. How strong you might ask? Strong enough for me to stream movies from out here!

ON THE HORIZON

As we look forward to Fall, we can't help but reflect on how far we've come this year. It has been inspiring to see our community come together in new ways. We hope to embody that spirit as we move into the next season.

In the works, we are looking into outdoor movie showings and partnering with community groups to explore a range of activities that bring us together even if we're still 6 feet apart.

Stay safe!
